

Two-page Coursework for *RANC*

Name: San Zhang
Stu. No. 2022109

Abstract

Please manually place the *IEEETran.cls* file in the tex folder if compilation does not work well.

I. INTRODUCTION

This is a coursework template for *Recent Advances in Network Computing*. Requirements are listed as follows.

- Combine your research topic with network computing, in any aspects that you think make sense.
- To ensure review quality, the length should be no more than two pages.
- Only *necessary* references are required to be cited (eight or fewer references recommended).
- Only one figure is allowed, to illustrate the motivation or basic idea of this coursework.

II. MOTIVATION AND BASIC IDEA

In this section, you need to address one key problem: How network computing impacts your target problem, or how your research tools can be used to enhance network computing.

III. KEY CHALLENGES

IV. POTENTIAL SOLUTIONS/DISCUSSION

V. CONCLUSION
